

Knowledge Network on Sustainable Intensification (KNSI)

The Spanish Context

National Research Lead: Paloma Melgarejo

National Funder Representative: National Institute for Agricultural and Food Research and Technology (INIA)

FACCEJPI | Agriculture Food Security and Climate Change

1. Describe any existing (formal or informal) national SI networks and national funding for them (if in place).

The Functional SI Network in Spain is a Team Composed by INIA and the National Autonomous Regions

INIA, as Part of the Central State, Coordinates and Finances

FACCEJPI | Agriculture Food Security and Climate Change

2. Describe the SI community in your country and how it relates to a network.

FACCEJPI

Coordination-State Plan application
INIA - Autonomous Regions System

FACCEJPI | Agriculture Food Security and Climate Change

3. What are the SI research (and funding) strengths and priorities for your country?

Strengths and Priorities are in Line with the R&D National Plan, Corresponding to SI in Animal and Crop Farming as well as Sustainable Forestry Exploitation.

Funding Years 2014-2015:

- Challenge 8: SI Agri & Forestry (836.000 €)
 - Challenge 10: SI Animal (2.433.000 €)
- [TOTAL 3.269.000 €]

FACCEJPI | Agriculture Food Security and Climate Change

4. What would you like to get from the Knowledge Network?

At National Level:

1. Share Expertise and Data among the Different Centres
2. Improve SI along the Different Areas of Interest and Regions

FACCEJPI | Agriculture Food Security and Climate Change

5. What would you like to see the KNSI achieve at the European level (short term and longer term)?

At Trans-National Level:

1. Team-Building with Relevant R&D Groups
2. H-2020: Work in Common Projects / Publishing
3. Share our National Expertise / Best Results with Others
 - o Efficiency in Water Use
 - o Greenhouses
